Overview

The Evolution of Precision Designed for maximum precision and optimum safety, giving the user total control over Document Finishing, Rexel ClassicCutTM Guillotines represent the evolution of precision cutting technology. Blade Locks and Acrylic Safety Guards on all models provide ultimate protection without compromising accuracy.

Description

Ergonomically designed with versatility, precision and safety in mind, the Rexel ClassicCut™ CL100 A4 Guillotine is the ultimate in lightweight A4 cutting guillotines.

It's the perfect solution for schools, the home office or small businesses with light multi-application cutting requirements up to A4 size. From timetables to training material, menus to manuals, the ClassicCut™ CL100 enables you to trim up to 10 sheets of paper perfectly and quickly. It comes with a 2 year warranty, so you can purchase with confidence.

Accurate: consult the myriad of gridlines marked on the light, plastic base to be sure of an accurate finish. All measurements are shown in both cms and inches for maximum flexibility and ease of use and there are paper guides too from A7, A6 and A5 up to A4 size for quick reference. Together these features ensure precise paper alignment and an exact cut to minimise mistakes and wastage.

Safe: with such a powerful cutting tool, user safety is crucial. Neat rubber feet prevent slipping and ensure table-top stability. An unbreakable, transparent safety guard keeps fingers well away from the razor-sharp cutting blade yet gives a clear view of the trim line for an accurate finish. The cutting arm should always be placed in the down position and secured with the blade lock when the guillotine is idle for optimum safety.

Reliable: the stainless steel cutting blade is self sharpening for long-lasting, maintenance-free operation so you can be sure of a clean cut time after time. It can slice through up to 10 (80gsm) sheets at a time to help you stay on top of your workload and breeze through the day.

Features

- Lightweight plastic base is marked with grid lines, measurements and paper guides for an accurate cut
- Non-slip feet for stability when trimming
- Self-sharpening stainless steel blade with an ergonomic handle
- Use the Blade Lock when guillotine is not in use for added safety
